

## **Working with 1<sup>st</sup> Choice Staff Recruitment**

We like to work closely with our clients in order that we can offer the best recruitment service possible. Therefore we follow tried and tested methods of working in partnership as well as attracting the right talent for your business.

We like to meet all our clients to understand fully your business, it's culture, the department structure and environment we will be recruiting for and most importantly the person fit. Finding the right person fit makes a more secure and long lasting placement, which is the desired result we seek for all our clients and candidates.

Working closely at the beginning of the process helps this happen, investing a little time at the early stage makes all the difference which is why we like to come into your business briefly to speak with you. Please find detailed below a brief synopsis of our process; we will talk this through with you in person when we meet you to decide with you what will work best for you when we embark on your next recruitment campaign.
